

CYBERAID

AI-Driven Cybersecurity for Financial Service Providers

Key Objectives

Reference Architecture and Blueprints for Multi-Aspect Cyber Security in Financial Sector

Proactive Vulnerability Management and Data Protection

Real-Time Monitoring Detection and Response

Vulnerability Management and Incident Report

Validate and Evaluate Cyberaid Solutions in Real-Life Multi-Facet

Integrated Platform, Learning Center for Cybersecurity and Resilience in Financial Industry

Ecosystem of Interested and Committed Stakeholders

Pilots

- 1. Tiered Client Impersonation Detection for Private Banking and Trading Systems**
- 2. Advanced Anti-Money Laundering Detection for Payment Service Providers**
- 3. AI-Enhanced Anomaly Detection and Incident Response for Banking Cybersecurity**
- 4. Cyber-Resilient AI-Powered Threat Detection and Risk Modelling for High-Frequency Trading**
