

2026 ECSCI Cluster Webinar Series
Monday, 26 October 2026 · 14:00–15:45 CEST · Online

2026 ECSCI Webinar Series

3rd Webinar – Monday, October 26th, 2026

Agenda

14:00 – 14:05 *5 min*		**Welcome & Opening Remarks** **Prof. John Soldatos | Dr. Habtamu Abie** · ECSCI Cluster Coordination *Series overview · ECSCI mission & objectives · Introduction of speakers*
14:05 – 14:30 *20′ talk + 5′ Q&A*	**ENDURANCE**	**ENDURANCE: Resilience of Critical Infrastructures against Cyber, Physical and Natural Threats** **Liana-Miruna Predut** · Eviden Romania | ENDURANCE (Q&A support: Adelin-Marian Homoraceanu, Eviden Romania) *Interoperable resilience solutions · Cross-border pilots · Energy, health, digital services & water*
14:30 – 14:55 *20′ talk + 5′ Q&A*	**ACT4FOOD**	**ACT4FOOD: Cybersecurity for Food Supply Chains** **Odysseas Kokkinos** · INNOV-ACTS Ltd | ACT4FOOD *AI-driven threat detection · SOC 4.0 · Aquaculture, dairy & retail · DIGITAL Europe Programme*
14:55 – 15:20 *20′ talk + 5′ Q&A*	**TELEMETRY**	**TELEMETRY: Trustworthy Cybersecurity Testing of IoT Devices and Systems** **Steve Taylor** · University of Southampton | TELEMETRY *IoT vulnerability detection · Component- and system-level testing · Trustworthy methodologies*

About the Presenting Projects

ENDURANCE

ENDURANCE is a 3-year Horizon Europe project (Grant Agreement no. 101168007) uniting 23 partners from 7 European countries. It strengthens the resilience of critical infrastructures, including energy, health, digital services and water systems, against cyberattacks, physical threats and natural disasters through interoperable solutions and cross-border pilots. **Website:** https://endurance-horizon.eu

ACT4FOOD

ACT4FOOD is a DIGITAL Europe Programme project (Grant Agreement no. 101249720), launched in December 2025, developing cybersecurity solutions for food supply chains. It combines AI-driven threat detection, real-time monitoring, secure information sharing and tailored training, with pilots across aquaculture, dairy manufacturing and retail. **Website:** https://act4food.eu

TELEMETRY

TELEMETRY is a Horizon Europe project (Grant Agreement no. 101119747) led by Nokia. It brings together academia, research institutions and industry to develop trustworthy cybersecurity tools and methodologies for testing IoT devices and systems, with vulnerability detection at both component and system levels. **Website:** https://telemetry-project.eu

Practical Information

- **Format:** Online Webinar (connection link shared upon registration)
- **Recording:** Session will be recorded and shared via ECSCI community channels
- **Language:** English
- **Organizers:** John Soldatos & Habtamu Abie
- **Cluster:** www.ecsci.eu

Funding Acknowledgement: *The presenting projects have received funding from the European Union's Horizon Europe and DIGITAL Europe research and innovation programmes. The ECSCI cluster brings together project teams in cybersecurity for critical infrastructure protection to share results and foster cross-project collaboration.*
